

$$x = 9 - y^2$$

$$y^2 = 9 - x$$

along

$$x = 5$$

y-axis;

$$9 - y^2 = 5 \quad y = \pm 2$$

$$\int_{-2}^2 (9 - y^2 - 5) dy = 10.7$$

along x-axis;

$$2 \int_5^9 \sqrt{9-x} dx = 10.7$$
